

COVID Cohort BPA Providers – IL & WI

End Users Affected: Inpatient Providers and APCs

The COVID Cohort BPA will display upon entering the chart of patients who have a documented negative COVID-19 test and have been in a double occupancy room for greater than 72 hours.

- The provider will receive a BPA pop-up upon entering the patient's chart.

Critical (1)

Patient has documented negative COVID-19 test and has been in a double occupancy room for >72 hours.
Infection Prevention recommends these patients be **retested every 72 hours while being co-horted.**

⚠ Check system COVID Resource Toolkit for latest testing guidelines on Cohorted Patients.

Order Do Not Order [2019 Novel Coronavirus \(SARS-CoV-2\)](#)

Acknowledge Reason

Not Clinically Accountable

✓ **Accept** Dismiss

- The **Order** button will be auto selected to place the order for the 2019 Novel Coronavirus (SARS-CoV-2)
- Click **Accept**.
- This will open up the Manage Order activity.
- Follow your normal procedure to sign orders.

After entering the order, the alert will not display again until another 72 hours of cohorting have passed.

*** If you are not clinically accountable, please select **Not Clinically Accountable** and select **Dismiss**.
Dismissing the alert BPA will suppress the alarm for 2 hours.

All providers: if someone else addresses the alert after you have dismissed it by placing a COVID test order, then the alert will not display again until 72 hours of cohorting have passed.
