Talking About COVID-19 with Children

*Please Note: These resources are intended to be reviewed by parents and caregivers and adapted for each individual child based on their development

General Tips and Suggested Language to Use

- **Deliver honest and simple information (minimize media exposure)**
 - "COVID-19 (sometimes called Coronavirus) is a new illness that can be spread by germs. Scientists are still learning a lot about the virus to keep everyone as safe as possible."
 - Describe hand washing and social distancing as ways that we can work together to slow down the virus.
 - Explain what steps are being taken to keep everyone healthy and safe as well as what steps would be taken if someone became ill.
- **Give your child a sense of control and normalcy**
 - Keep bedtime, wake time, and meal times consistent as much as possible. - Incorporate various activities in the day. (see reverse side for suggestions)
 - Encourage children to take part in and come up with age-appropriate activities in line with social distancing and cleanliness.
 - Develop clear guidelines and limits around what is allowed and what is not.
 - Let the child know that as you hear more information, you will let them know.
- **Validate and normalize feelings as well as model behaviors and responses that are serious, yet calm**
 - Validate their feelings while doing your best to reduce worry by explaining what is being done to help, clarifying information, and keeping them busy.
 - Give children the opportunity to talk and ask questions.
 - Instead of telling your child not to worry, try saying:
 - "It can be scary and that is why it is important that we..."
 - "Doctors, nurses, and hospitals are trained on how to keep patients safe"
 - "I'm worried about people who are sensitive to germs too; that's why we are going to stay home and do our best to have fun together"
 - "It's confusing because we don't feel sick but it is still important for everyone to stay apart to keep germs from sharing right now" "This is teaching us what to be grateful for... the things we can live without...etc."
