

Accessing WI Applications Remotely

On an Advocate Aurora or non-Advocate Aurora
Device Using Cisco VPN

Connect to Cisco AnyConnect VPN with Duo

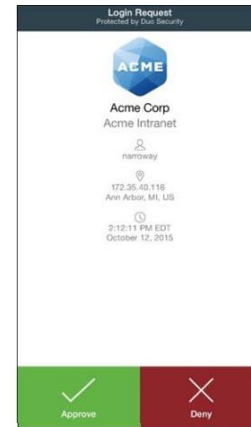

- Open the **Cisco AnyConnect VPN** with the client on your workstation.
- Select **AHC_VPN** from the drop-down menu.
- Click **Connect**.
- Note: If you do not have AHC_VPN in the first drop-down menu please contact the Service Desk.

- Select **AHC_VPN** from the **Group** drop down menu.
- Enter your **employee ID** and **password** (like logging in to your workstation).
- Note: To simplify the Duo process, use the Duo app to obtain a 6-digit Passcode. Enter in the Password field.

- Open Duo notification on the Duo app.
- Press **Approve**.
- Note: If you are **not using the mobile app**, answer the phone call from Duo and press a key to approve the authentication. The VPN client will proceed automatically.

Accept the Connection to the Network

- To sign out, click on the AnyConnect Symbol and select Disconnect.
- To log in again, click on the AnyConnect Icon.
